BEFORE YOU BOOK

A few final things to know

Clear information about the vehicle and your expectations helps us recommend the right service, schedule, and budget.

Pricing & Vehicle Size

All prices are in Canadian dollars. Complete selectable pricing is listed in this guide. If you are unsure which vehicle category applies, contact us before booking.

Routine vs Deep Cleaning

Essential services are intended for routine care, not deep stain removal. Heavy pet hair, old stains, dye transfer, mildew, grease, and severe contamination usually require an Add-On or Advanced Detailing service.

Result Expectations

Permanent fading, corrosion, cracking, paint damage, worn materials, deep scratches, and contamination that has penetrated a surface may not be fully correctable. Safe preservation of the material always takes priority.

Service Time

Times are typical estimates. Vehicle condition, drying, curing, shop workload, and simultaneous projects can affect completion. Advanced detailing, correction, and coating services usually require the vehicle to remain with us.

Ceramic Coating & Maintenance

Ceramic protection improves resistance, hydrophobic performance, and ease of cleaning, but it cannot prevent stone chips, scratches, curb damage, or material failure and does not make the vehicle maintenance-free.

Vehicle Preparation

Please remove valuables and disclose known electronic, mechanical, water leak, material deterioration, or previous repair concerns. We will discuss any area that cannot be treated safely.

STORAGE COMPARTMENTS & PRIVACY - CLEAN LEVEL

For privacy, we do not open or clean inside the centre console storage compartment or passenger-side glovebox by default. Tell us at drop-off if you would like these areas cleaned; there is no additional charge.
